eQuaLearn's Introduction to Nadcap Chemical Processing is a one or two-day course designed to provide a complete overview of Nadcap requirements related to the Chemical Processing audit. The course is taught by a Nadcap expert.

- Scope of the Chemical Processing Audit and Table I
- Review/Discussion of the Top 10 audit findings
  - Complete vs. Incomplete responses to findings
  - Typical reasons for responses not being accepted
  - Appeals process
  - Supplier merit and failure policies
- Explanation and clarification of the checklist requirements and checklist appendices
- Continuous process improvement

*A one or two-day course designed to provide a complete overview of Nadcap requirements related to the Chemical Processing audit*

## No-one knows Nadcap like PRI

As the organization that administers Nadcap, PRI has two decades of experience and involvement with the program.

As well as the insight provided by the course content, participation offers the opportunity for one-on-one time with a Nadcap expert. Take advantage of the years of experience of the course instructor to improve your operations. This is also an opportunity to learn best practices and share ideas with other participants.

## Every participant will receive:

- Introduction to Nadcap Chemical Processing course booklet
- CD with an electronic copy of all materials
- Course completion certificate
